

Virtual Training Day - December 17th

Last Modified on 11/10/2021 11:17 am MST

MiTek is excited to announce its next Virtual Training Day on Friday, December 17th, 2021.

[Click here to register for a single session or all sessions!](#) <<<<---

December 17th - All times listed are for the Mountain Time zone.		
8:30 AM	9:00 AM	MiTek Management Basics MiTek is offering a 30-minute session highlighting general designer tips for MiTek Management. The session focuses on designer-centric topics, including re-costing, importing release groups, and adding loose items to a project.
9:15 AM	9:45 AM	MiTek Automation Join MiTek's AMPForce team for a 30-minute session covering Preventative Maintenance for MiTek equipment. This session provides attendees with proven tips and tricks from MiTek equipment manuals, support videos, and maintenance checklists.
10:00 AM	10:30 AM	MiTek Structure 853 Review - (NEW) Join us for a review of new features in MiTek Structure version 853. Smart Rebuilds – Starting in 8.5.3 user edits to trusses, such as webbing and material changes, will be maintained through automatic rebuilds, and the truss will be highlighted for review. Manage All Settings – In 8.5.2 this new command was added to File > Setup which launches a window to search all Structure property and setting locations at once and allows changes to any of them. Floor on Roof/Roof on Floor Manual Loading – In 8.5.3 manual floor loads can be applied to roof trusses and manual roof loads can be applied to floor trusses with the appropriate load cases created automatically.
